CYMA cordially invites you to attend our annual user conference "Exploration 2008". Come and learn more about the CYMA software, trade tips and tricks with other CYMA users and more importantly, get essential training on the CYMA modules and the integrated third party applications you use on a regular basis. Exploration 2008 conference will be held in the heart of Tempe, Arizona at the Tempe Mission Palms, June 11 - 13, 2008.

Exploration 2008 focus:

- Provide input on future versions of CYMA^{IV}
- Receive essential CYMA training
- Network with other CYMA users and Resellers
- Learn ways to improve your CYMA usability from leading experts in the field
- Gain knowledge from experts versed in the field of technology and the accounting workplace
- Take a sneak peak at CYMA^{IV} Version 11 and other new products

And much more...

For those end-users unable to attend the 2008 CYMA Exploration, AMBR Technologies will host our educational events in both Memphis and Jackson Tennessee. We are actively polling our clients at this time for interest in attendance. [Please click here and let us know your city and subjects of interest.](#)

Tips & Tricks!

Tips & Tricks!

While creating recurring entries in Accounts Receivable you may create as many sub-groups as you desire. Simply choose a group setting (Monthly, Weekly, etc....) while entering recurring entry invoices and then type the "Group" name that you desire. Once saved, this group will be available for all future invoices and generations.

Customer Relationship Management (CRM)

Your customers are going to get the attention they deserve! Either by you or your competition! Why take chances on customer satisfaction. INFOtrac for AccountMate manages and reports on every interaction entered for a prospect, client, supplier, contact or branch office. It will even schedule the next appropriate interaction—enabling exceptional account management and customer service. With just a glance, you can view all the past interactions with each contact providing the ability to track activity, issues and interactions with all your clients. It will even manage your meetings, phone calls, e-mails and daily tasks.

CYMA is now offering the 2008 Not-for-Profit Bundle for qualifying 501c (3) organizations. [Refer an organization and earn \\$200.00 upon the close of sale.](#)

This program includes: General Ledger, Accounts Payable, Payroll for up to 25 Employees (upgradable), Grant Tracking, F9 Financials for Excel, Pervasive Workgroup Engine, 1 year Annual Maintenance and 2 concurrent users.

Need More? [AccountMate](#) offers an Open-Source Software that is # 1 rated by Experts in the Mid-Market.

In evaluating business accounting systems, ASA determined that AccountMate was the premiere open-source code system in the mid-market. It ranked second in overall performance, right behind Microsoft Great Plains Dynamics, which lacks open-source flexibility.

"We took 350 key features," Whitehouse explained, "and ranked them for importance. Then we compared these features across 62 products ranging from QuickBooks to SAP. In this highly competitive ranking, AccountMate came in first among open-source systems and second in the mid-range overall."
